

UX Project Lead

ConnectFive works with a client in the agricultural industry to define, design and deliver user-centered interfaces for advanced vehicle and embedded devices. Our work explores advanced touch interactions with the challenge of making what is complex simple for users. We are committed to creating experiences that enable our customers to do their best work while delivering on the promises of our brand. We are a creative, passionate and growing team.

Primary Purpose and Function

To serve this client, the Project Manager directs activities for projects across multiple platforms from concept through specification. This role collaborates with cross-functional teams internally and with business partners.

Do you ...

- Get excited when a team works well together
- Foster open and honest team communication
- Prefer to get things done through influence rather than authority
- Exhibit a good sense of humor even under pressure
- Adjust your approach to your audience
- Effectively manage multiple priorities and have stellar organizational skills
- Promote a service oriented attitude
- Demonstrate an innovative outlook
- Exhibit an entrepreneurial and creative spirit
- Have an affinity for getting things done without being told what to do
- Encourage others to do their best and improve their trade
- Enjoy mentoring and learning from others

Essential Functions and Responsibilities

- Collaborate with cross-functional project teams on complex technical assignments to define tasks, identify resource requirements and develop and maintain project schedules
- Organize and facilitate meetings effectively
- Communicate project status and deliverables
- Drive issues to resolution without getting caught up in roles and responsibilities
- Must possess a valid driver's license. Regional travel required, up to 4 days per month

Minimum Qualifications:

- Bachelor's degree in computer science, engineering, business administration or equivalent training/experience, including supervisory experience
- 5 to 7 years project management experience in a variety of cultures; 3 years using agile methodology
- Strong understanding of scrum events including sprint planning, daily scrums, sprint review, and sprint retrospective
- Project management experience with digital products and services and/or a creative environment
- Experience with Trello, Rally and Adobe Illustrator
- Excellent communication, facilitation and coaching skills
- Exemplary organizational skills

Preferred Qualifications

- UI/UX project management experience
- Agricultural experience

Term

Full-time. Comprehensive benefits package available for full-time employees.
Position located in Coralville, Iowa.
